

## *Welcome to Hotel Quintessence at Tremblant sur Le Lac*

*The historic definition of "Quintessence" describes Quintessence as the fifth element added to the other four elements - earth, air, fire and water - to form the universe. This element represents purity, soul and spirit. It is believed to be the substance of what heaven embodies. "The quintessential things of life." Our goal is to provide all the elements that will allow our guests to experience a lasting sense of well-being. Everything we do is guided by this philosophy.*
